You will be presented with this screen showing you the current game information as well as fields where you can change these values. If you do not change any values, the game will not be updated. Changing the name to another game that already exists in the database will also not let you edit the game.

The game with the name Borderlands already exists in the database.

If we type 'Borderlands' which already exists, we will see:

Game was not updated as no values were modified.
